

PanaVerse Assginment

Question#10:

10. Adding Comments: Choose two of the programs you've written, and add at least one comment to each. If you don't have anything specific to write because your programs are too simple at this point, just add your name and the current date at the top of each program file. Then write one sentence describing what the program does.

Solution:

Question#02:

```
let personName = "Eric"; //store person's name in block variable.  
console.log("Hello " + personName + "\nDo you want learn some python with us?"); //print  
simple message to that person.
```

Question#06:

```
// '\t' means four spaces  
// '\n' used for end line  
let person_name: string = "    \tHammad Ameer\n    "; //store name with white  
spaces.  
console.log("Name Before Stripping : " + person_name); //display name on console  
without stripping.  
console.log("Name After Stripping : " + person_name.trim()); //display name on  
console after stripping.
```
